Proposal 5: We are a small licensed motor vehicle repairer business and we work on all types of ICE vehicles under 4.5t and over 4.5t, we have been in business since June 2005. These new licensing proposals will greatly impact our customer base and greatly

disadvantage us in earning the income that we need to keep our doors open as a small business and also gives us the ability to employ staff. If we were to lose our business because of the proposed licensing changes there would be three people out of work. This new proposal makes no sense that it will include mechanics that have been working the old system successfully for many years. It makes more sense to me that you make these licenses for new mechanics moving forward but leave historic mechanics in the old licensing system.

I have been a motor mechanic able to work on heavy & light vehicles since my apprenticeship in 1987 and I am not sure why all the historic motor mechanics will be penalised under the new proposals when we have been doing all these things for as many years as we have.

Proposal 7: We have been selling and fitting tyres since our inception and I have been fitting tyres since i was an Apprentice which i started in 1987. As i am already licensed to do all these things I am not sure why my licensing needs to change.
